The Leibniz Institute for Prevention Research and Epidemiology – BIPS GmbH is one of the leading epidemiological research institutes in Germany and a member of the Leibniz Association. The institute features a dynamic and international working environment with a diverse research data infrastructure.

The University of Bremen is an outstanding research university with 320 professorships and 20,000 students. The health sciences are one of six high-profile research areas of the University and the State of Bremen.

We are aiming to fill the following position at the next possible date:

**Tenured professor**

in the Faculty 11 Human and Health Sciences of the University of Bremen in the field of

**Implementation research and evidence-based prevention**

Grade W2 of the German civil service salary system

Reference number: P421/20.

The position entails leading an independent research group in the department “Prevention and Evaluation” at the Leibniz Institute for Prevention Research and Epidemiology – BIPS. Furthermore, the successful candidate is expected to assume the position of deputy head of this department. The professor will be selected by a joint appointment committee of the University of Bremen and BIPS.

Should the general requirements of civil service law be met, the candidate will be granted civil servant status for life.

The successful candidate will conduct research at BIPS. Collaboration in the high-profile area Health Sciences of the University of Bremen and participation in the Leibniz Science Campus Digital Public Health will be expected. Regular teaching obligations amount to two hours per week.

We are looking for a team player with a proven track record in implementation research and evidence-based prevention. The person should apply innovative research approaches to questions of evidence-based implementation and evaluation of preventive intervention strategies, and actively participate in the strategic development of prevention-oriented implementation research at BIPS. Internationally published research on these topics applying a broad spectrum of methods such as evidence synthesis and method/ theory development is also expected. Practical experiences in the area of complex interventions and their implementation as well as international networking and participation in research alliances are an asset.

The university expects participation in the bachelor’s and master’s degree programs in Public Health and Epidemiology and a strong commitment to the advancement of teaching. In particular, teaching should cover epidemiological aspects of implementation research and evidence-based public health research.

Prerequisites for the position are:

- A university degree and an outstanding dissertation
- Habilitation or habilitation-equivalent achievements in Public Health or other fields relevant to this position which may have been achieved during a junior professorship
- Successful acquisition of competitive third-party funding from various funding bodies
- Relevant experience in project and team management
- Excellent publication record in international journals
- Qualification in higher education didactics and teaching experience
- Willingness to participate in courses on higher education didactics
• Excellent English language skills. For non-German speakers, willingness to learn German in the foreseeable future is assumed.

The appointment is based on Section 18 of the Bremen University Act [Bremisches Hochschulgesetz (BremHG)] in conjunction with Section 20 of the Bremen University Act and Section 116 of the Bremen Civil Servants Act [Bremisches Beamtenrecht (BremBG)].

The University of Bremen and the Leibniz Association aim to increase the proportion of women in science and strongly encourage female scientists to apply. International applications and applications from scientists with a migration background or with experience working abroad are particularly welcome. Severely handicapped applicants with substantially equal qualifications will be given priority. Both institutions have received awards for their family friendliness.
